

MAXFLO M-11

The **MAXFLO** unit has been engineered using high quality products housed in a 16 Gauge steel cabinet, finished in dark brown chemical resistant polyurethane paint for long unit life. Each unit is a self-contained system and can be used individually for smaller areas or in groups for larger ones.

MAXFLO M-11 provides efficient removal of irritating contaminants such as smoke, odors or dust. **MAXFLO M-11** uses efficient filters which have been constructed using micro-glass fibers. The filters are able to separate sub-micron particles from the air passing through the unit and hold them in high quantities. One inch washable foam prefilter catch the larger particles and extend the bag filter's life. The **M-11** also comes with the option of adding a carbon or HEPA filter.

Diversified Air Systems, Inc., has been in the air cleaning business for over 31 years and has provided air cleaning systems in thousands of industrial plants throughout the entire United States, Canada, South America, Asia etc. We offer a three year warranty on all parts (excluding filters).

APPLICATIONS	FEATURES	BENEFITS

MAXFLO M-11

INSTALLATION:

Installation of your unit is usually quite simple. The unit is designed for chain hanging, rod mounting, or a wall bracket installation. The location of the units and the design of the airflow system can best be handled by your sales engineer after an inspection of your particular area.

Specifications for M-11

Dimensions	20"W x 15"H x 44"L
Weight	80 Lbs.
Speed Control	Variable Controller
Input Power	115 Volt 1 Phase
Min. CFM	300 CFM
Max. CFM	1100 CFM

Options M-11

- Pressure Gauge: Indicates when to change filter
- HEPA Filter
- 2" Charcoal Filter
- 18 Lbs. Charcoal Module
- Silencer
